Dear Department of Transportation,

When planning the reconstruction of I-81, please take my following comments into consideration:

Elevated highways through cities hurt cities immensely in many ways. The City of Syracuse is the hub of Central NY and needs to maximize opportunities by taking down the viaduct.

The least cost alternative actually provides the most benefits as well.

Suburbs will benefit the most from the alternative that benefits the City of Syracuse the most.

I support the Community Grid and I live in the Syracuse suburbs.

Dear Department of Transportation,

When planning the reconstruction of I-81, please take my following comments into consideration:

It is imperative that there is a Mandatory 60% hiring requirement for the local PLA agreement. Economically the local economy will benefit more from Tax Revenue from income.

In terms of hiring requirements for DBE, this should at minimum require a 50% utilization rate. Increasing these requirements allow more dollars to remain local & therefore a boost to Local Economy.

Lastly, we need a DBE certification training in order to educate & inform the community about this process to increase & encourage Entrepreneurship.

In order to Attain Equity, we must require Equality of Access

Dear Department of Transportation,

When planning the reconstruction of I-81, please take my following comments into consideration:

Don't design / build for the ~~past~~ century's needs. Huge retail malls ?!? Personal car use ~~in~~without mass transit Uber/Lyft options ?!?

Erie Boulevard also was built to serve Shopping Town Mall & the "Burbs" and to support drivers of personal cars. Where's Shopping town now?

Trashing any central city to benefit suburban investors helps only a few stakeholders, not the majority of taxpayers

21st Century Best Practices include rapid rail, Rapid Bus Transit, etc. Look at the Rest of the World!!
